Tesla Crypto (TSL)

Transparent · Stable · Clean Energy

Introduction

Tesla Crypto (TSL) is a blockchain-based digital asset built on BNB Smart Chain, inspired by clean and sustainable energy. Our goal is to deliver a transparent, stable, and scalable ecosystem for secure transactions, staking, and DeFi applications.

Mission & Vision

Mission: Empower the community to use a dependable digital asset for payments, responsible holding, and participation across the ecosystem.

Vision: Strengthen the link between blockchain and real-world utility through green energy initiatives, transparent governance, and long-term sustainability.

Tokenomics

• Network: BNB Smart Chain (BEP20)
• Token Name: Tesla Crypto (TSL)
• Contract Address: 0xD6F354617Ad6c469283d2668020358f2ce4236D0
• Decimals: 18
• Total Supply: Defined at launch

Utility

• Fast, low-fee transactions on BNB Smart Chain
• Participation in DeFi and Staking
• Long-term holding as a transparent, stable asset
• Direct payment in future TSL-powered platforms

Roadmap

• 2025 Q3: Smart contract deployment, website & social media launch
• 2025 Q4: Listing on BscScan, TrustWallet, CoinGecko
• 2026 Q1: Launch of initial DeFi applications
• 2026 Q2: Partnerships with clean energy projects
